Dear Patient,

Welcome to our clinic. In order to have your surgery, you must have a pre-operative exam including a complete history and physical (H&P) with your primary care physician (PCP). An EKG is also required for males over 40 years of age, and females over 50 years of age. Blood work (labs) may also be required, if your PCP deems them relevant or necessary. Your pre-operative exam must be done **within 90 days** of your surgery, and **no later than 10-14 days prior to your surgery date**. This is necessary because you are undergoing a surgical procedure and will receive anesthetic medications through intravenous (IV) sedation.

Most insurance companies will pay for a complete physical one time per year. However, this varies between insurance companies. Some insurance companies will not pay at all. If that is the case, the pre-operative exam will be an out of pocket expense to you. We cannot do this exam at our office. The medical clearance and any tests **MUST** come from your primary care physician. It is not our intent to inconvenience you in any way, and these requirements are to ensure your safety for surgery.

We thank you for choosing us, and our staff looks forward to assisting you in the surgical process. In this packet, you will find:

- **History and Physical form for your PCP**
- **Appointment Schedule**
- **Prescription(s)**
- **Consent form for surgery**
- **Surgery checklist**
- **“What to Expect at the Surgery Center” information sheet**
- **Insurance information sheet**

Please call us with any questions.

Thank you,

The doctors and staff of Omni Eye Specialists
