

Cataract Post-Op Eye Drop Instructions

Antibiotic Drop (Usually a tan cap)

Due to insurance plans, the drop prescribed may vary.

Options may include: Besivance, Ofloxacin, Moxifloxacin, Tobramycin

Always follow the initial prescribing instructions, but typical use is 4 times a day for 1 week following surgery.

Besivance is 3 times a day for 1 week following surgery.

Steroid Anti-Inflammatory (usually a pink or white cap)

Due to insurance plans, the drop prescribed may vary.

Options include: Lotemax SM gel, Prednisilone, Lotemax

Always follow initial prescribing instructions, but typical use is:

Week 1: 4 times a day

Week 2: 3 times a day

Week 3: 2 times a day

Week 4: 1 time a day

Your doctor may amend this schedule based on your post-op course.

Non-Steroid Anti-Inflammatory (usually a gray cap)

Only certain patients are prescribed this drop.

Due to insurance plans, the antibiotic drop prescribed may vary.

Options include the following and are to be used for **4 weeks**:

Prolensa: 1 time a day

Bromfenac: 2 times a day

Ketorolac: 4 times a day

If you have questions or concerns about your medication use, please contact your Primary Eye Doctor or Omni Eye Specialists at 303-377-2020.
